FOR IMMEDIATE RELEASE

eMaint Travels to Chicago, Illinois to Host Popular User Group Summit

February 16, 2012 Marlton, NJ - eMaint Enterprises will be hosting a two-day User Group Summit for users of its X3 Computerized Maintenance management System (CMMS) at the Hyatt Place Lombard Hotel in Chicago, Illinois on May 1 - 2, 2012. eMaint hosted a similar session last December at the Cardinal Glass Manufacturing Facility in Buford, Georgia, and received such positive feedback from attendees that they plan to continue to provide live educational and networking events in other parts of the country.

eMaint is dedicated to ensuring the success of its clients through education. In addition to hosting monthly Best Practices webinars and X3 online workshops, eMaint maintains an online e-learning portal, eMaint University, which provides on-demand training, anytime, anywhere. Lauren Boothe, Customer Success Manager, notes "eMaint customers are from a broad range of industries and possess varying backgrounds and experience. The User Group Summit gives each client a chance to learn something new from their peers that they can apply toward improving operations at their organization."

The summit will feature an implementation case study presentation by James Hummer, Maintenance Manager of Clement Pappas. James served in the US Navy as a Maintenance Mechanic for 16 years and as a Maintenance Manager at several food processing organizations, including Gatorade, where he was first exposed to eMaint. He will share the challenges Clement Pappas faced and the benefits of implementing a CMMS which resulted in a world-class 99.2% completion rate for preventive maintenance activities.

Also included in the agenda are Maintenance Best Practices sessions presented by Terry Harris, President

Dedicated to Your CMMS Success for Over 25 years

of Reliable Process Solutions, who has been delivering training programs to help companies increase the effective life cycle of their equipment for over 25 years. In addition to the series of formal presentations and hands-on workshops, attendees will also have the chance to network with other X3 users and senior members of the eMaint product team.

James Wagoner, eMaint X3 user and Cintas Field Engineer, stated, "The best thing about the Summit is meeting with other eMaint X3 users and talking with them about how they are meeting the challenges we all face. It has been helpful to benchmark our utilization against what others are doing."

About eMaint Enterprises, LLC

eMaint, the leader in on-demand CMMS solutions, has been providing maintenance management software solutions since 1986 and was one of the first CMMS providers to develop a completely web-based "Software as a Service" (SaaS) model for more rapid implementation at a lower total cost of ownership. eMaint's client-base consists of over 10,000 users worldwide across 950 sites ranging from small & medium sized organizations to Fortune 500 corporations including manufacturers, service providers, fleet operators, energy and utility companies, health care facilities, universities, municipalities, and facility and property managers. For more information on eMaint products and services, please visit the eMaint web site at www.emaint.com.
