

FINE TUNE YOUR DAY-TO-DAY ACTIVITIES IN FIVE EASY STEPS

By fully leveraging Computerized Maintenance Management System (CMMS) software, organizations can coordinate maintenance, bridge gaps, and boost productivity.

MANAGE INVENTORY

Track and control parts throughout the supply chain. Have the spares you need, when you need them.

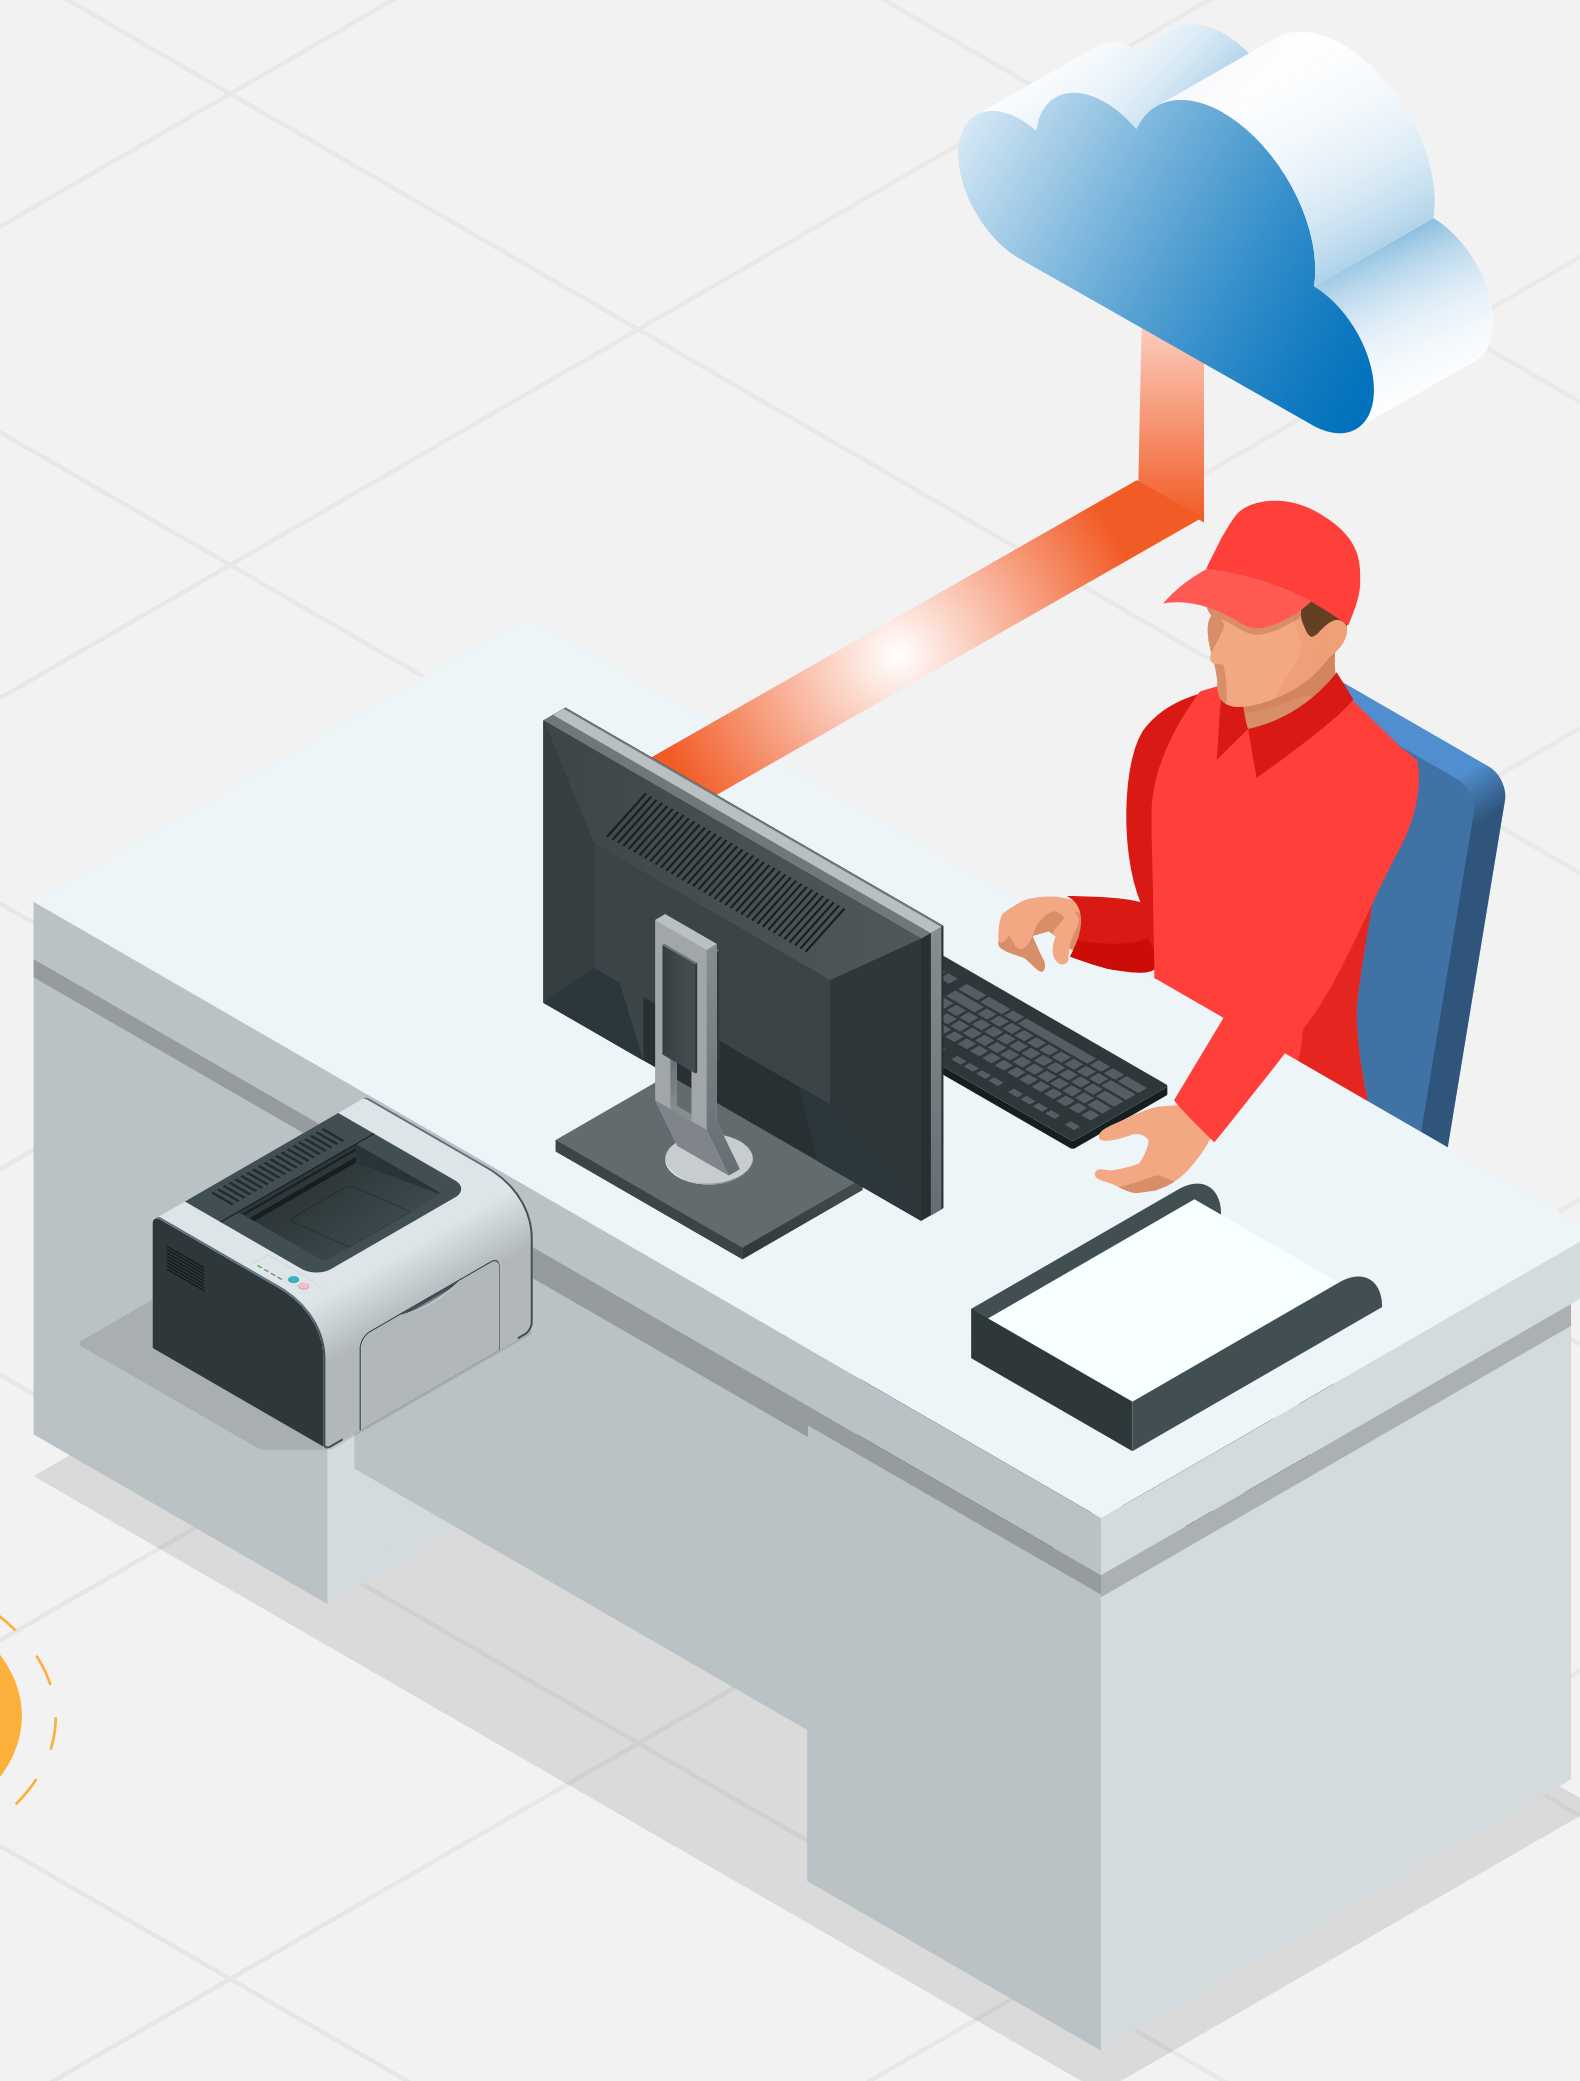

1.

MAINTAIN ELECTRONIC RECORDS

Assign and document work orders. Avoid compliance headaches by automatically receiving updated completions electronically.

2.

3.

INCREASE VISIBILITY

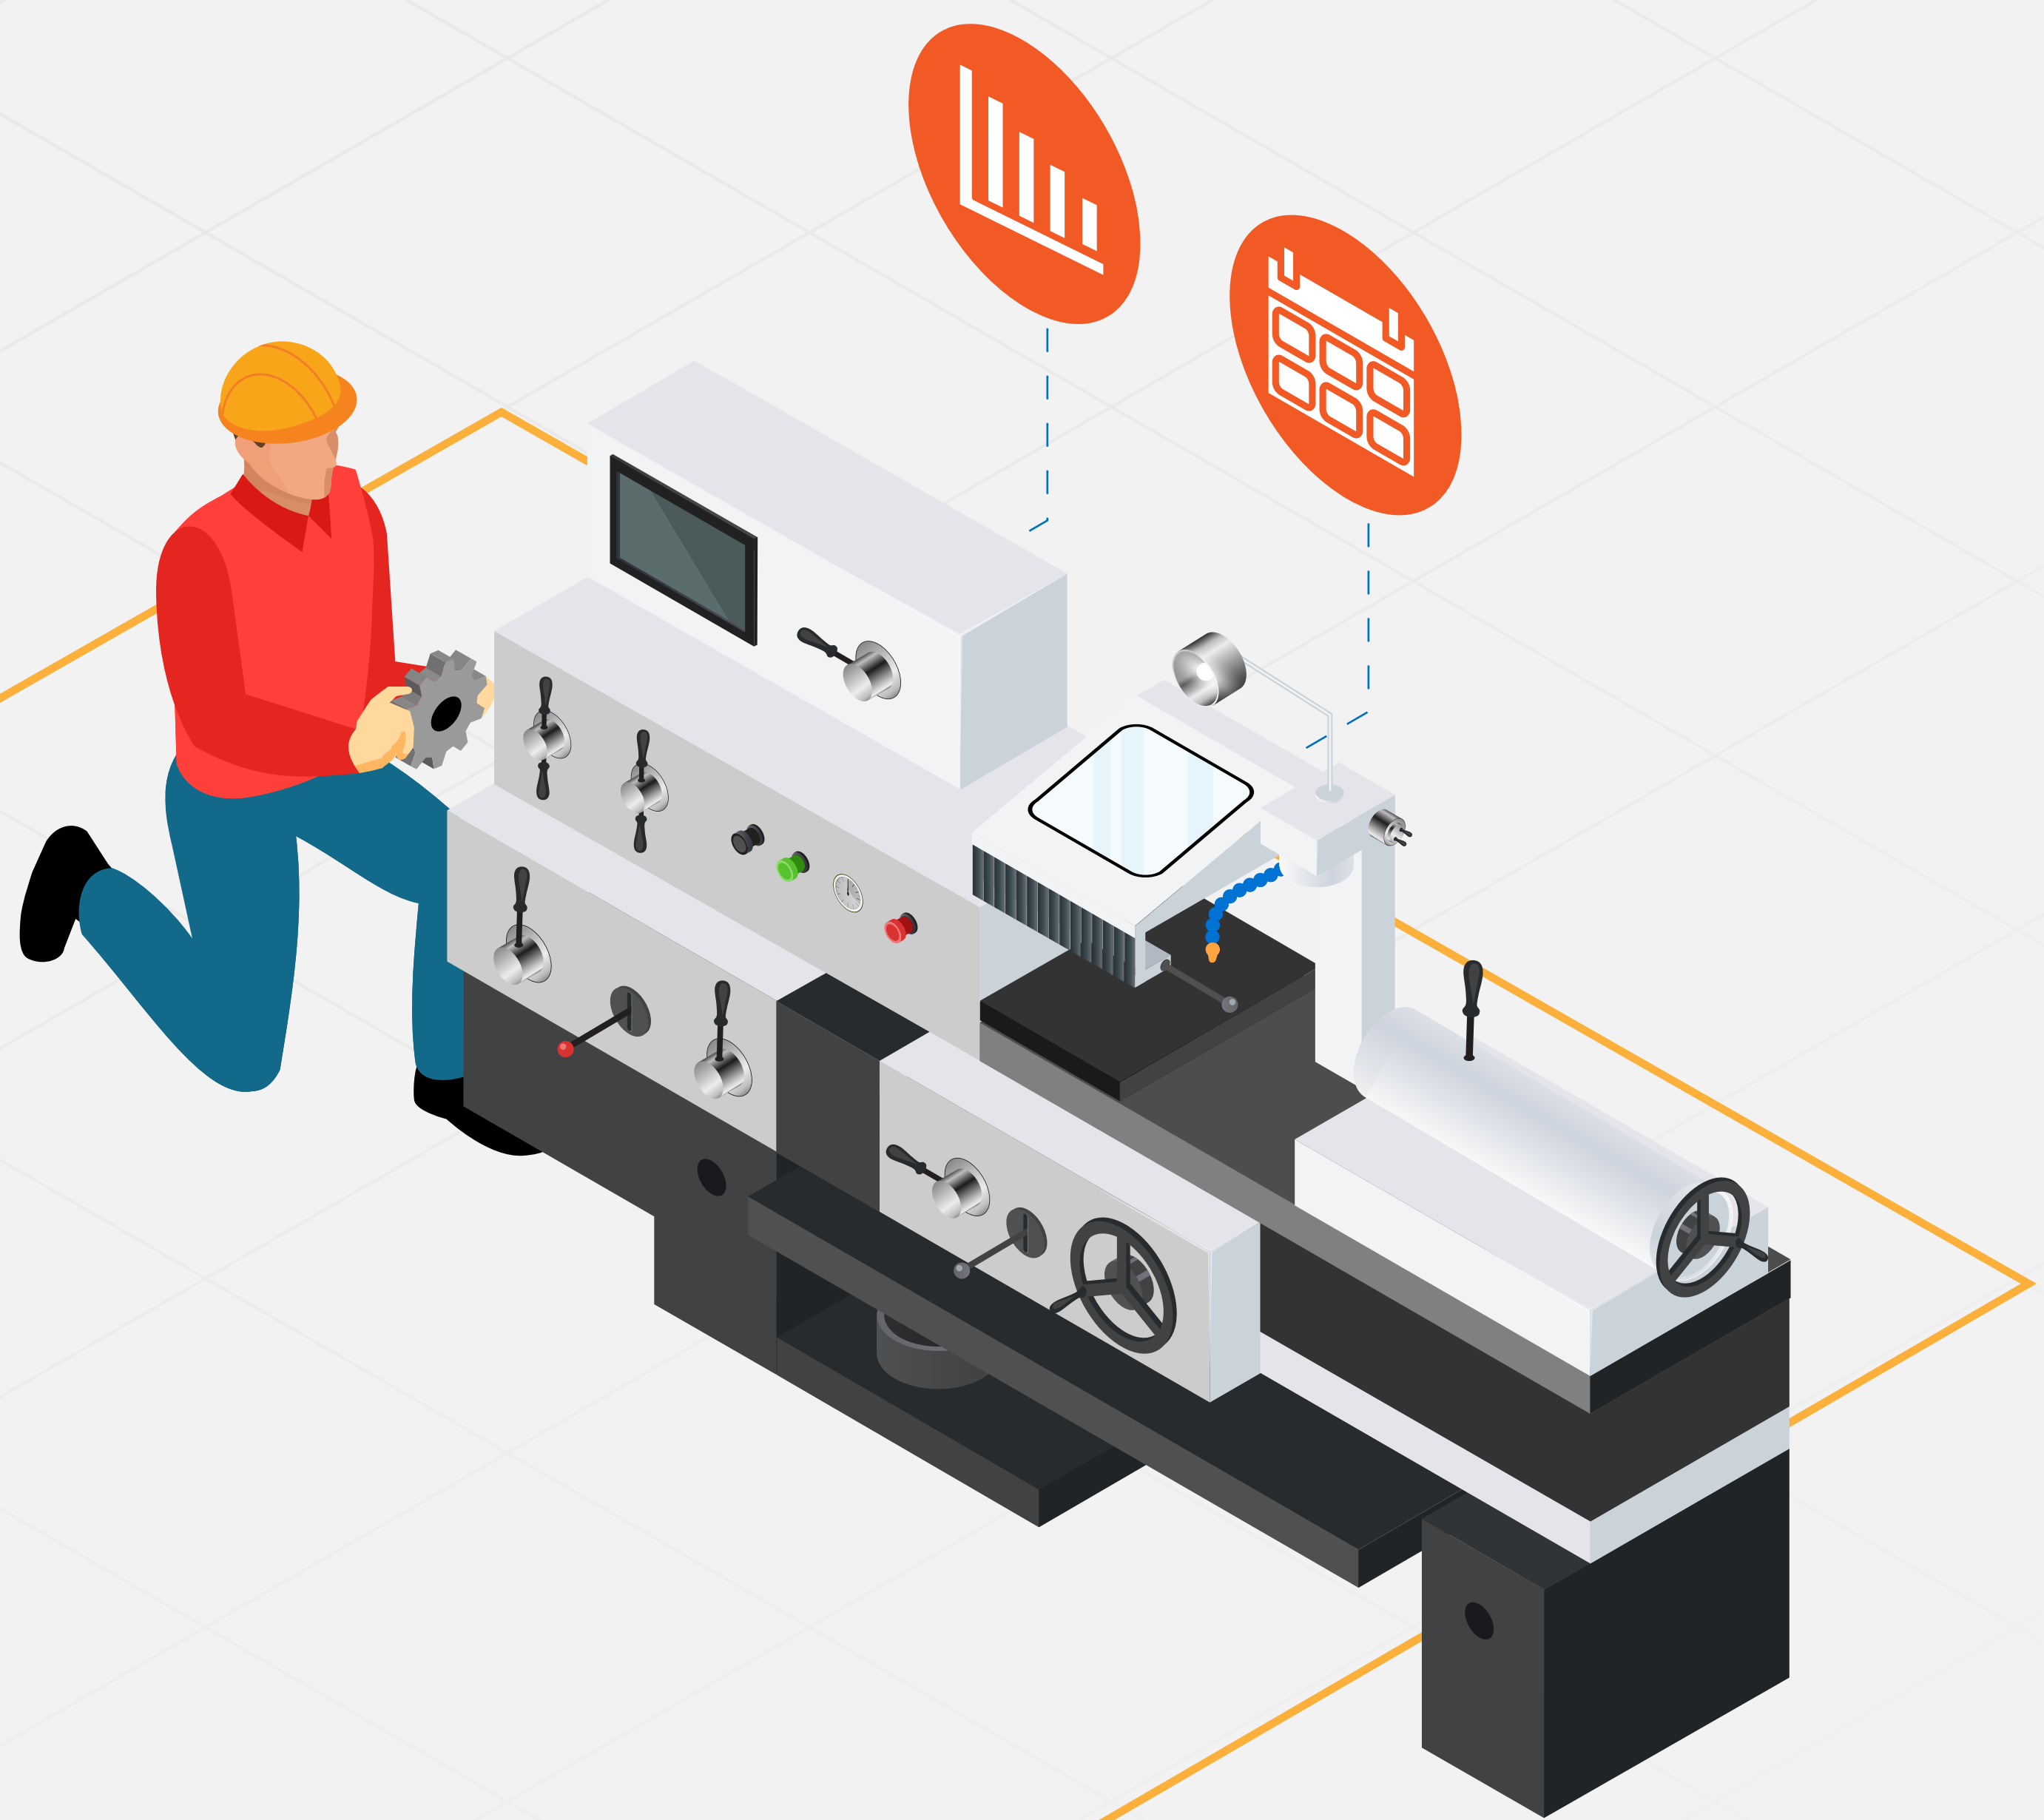

Enhance communication and connect all users, from technicians on the floor to executives receiving reports.

4.

IMPROVE EFFICIENCY

Streamline maintenance scheduling by triggering and assigning work orders based on calendar, meter points, or asset condition data.

5.

PERSONALIZED SUPPORT

The eMaint team helps customers along the CMMS journey from day one.

- ✓ A dedicated Customer Success Manager and team of experts
- ✓ Implementation, consulting, and technical services
- ✓ In-person training options and 24/7 access to the eMaint University (eU) training portal
